For example:-

- minute - minutes | horse - horses | bag - bags

Nouns that end in -ch, -x, -s, -sh, or -z form their plurals by adding 'es' to the end of the word.

For example:-

- church - churches | box - boxes | gas - gases | bush - bushes | ass - asses

Nouns that end in a single -z, the plural is formed by adding 'zes' to the end of the word.

For example:-

- quiz - quizzes

Most nouns ending in -o preceded by a consonant also form their plurals by adding 'es'.

For example:-

- potato - potatoes | tomato - tomatoes | volcano - volcanoes

However many newly created words and words with a Spanish or Italian origin that end in -o just add an 's'.

- photo - photos | piano - pianos | portico - porticos

Nouns ending in a consonant + y, drop the y and add 'ies'.

For example: "I went to the store." This sentence is about the speaker and their experience at the store. It's also possible for a singular noun to be an appositive such as in this sentence: "Tina was wearing her best dress." Here, Tina is being described by what she was wearing which is called an appositive. What is plural noun? Plural nouns are words that refer to more than one person, place or thing. Its singular is criterion, but evidence shows that criteria is frequently being used as a singular as well as a plural, much like data and agenda and their lesser-used singulars datum and agendum. As English borrows words from Latin and Greek, we sometimes must adjust our grammar to accommodate how those words were used in their original languages. This is particularly true with regard to plural nouns. Early English grammarians preferred to preserve the traditions of the classical languages, so Latin- and Greek-derived nouns often retained their Latin and Greek plural forms in English. This practice was retained particularly for academic and scientific writing. So the plural of radius is radii; appendix is appendices; genus is genera; bacterium becomes bacteria. Checking all the boxes. Or just the one. But in many other instances, the Latin or Greek plural was abandoned for the standard English plural. The Latin plural of gymnasium is gymnasia, but you would almost never see it pluralized as anything other than gymnasiums in English. There are numerous counterexamples. One is criterion, a word whose Greek plural is very much alive: criteria. Usage of 'Criterion' and 'Criteria' Criterion is defined as "a standard on which a judgment or decision may be based" or "a characterizing mark or trail." The former of these is the meaning in question when one says, "An important criterion for choosing where to dine is that there are vegetarian entrees on the menu." When I was dating, in my twenties and early thirties, my chief criterion in a romantic partner, after a sense of humor, was the ability to help me spot crises in advance, and lead us and our future children out of them. — Pamela Druckerman, The New York Review of Books, 12 May 2020 But the more serious problem may have been that fever of over 100 degrees was used as the one overriding criterion to determine whether a sick inmate required medical attention. — Tim Golden, ProPublica, 24 June 2020 Possibly because so many decisions are based on more than one factor, the plural criteria tends to show up more frequently in English than its singular form. In these instances, criteria typically follows the construction of a standard plural. Athletes are judged on a number of different criteria, including difficulty, execution, landing, and amplitude. — Justin Peters, Slate, 18 Feb. 2018 The law codifies the so-called ABC test, which sets three criteria to determine whether a worker ought to be classified as a contractor or an employee. — Eoin O'Carroll, The Christian Science Monitor, 2 July 2020 If they're still adapting—or if, as in some cases Gurelian says the ADHA has been informed of, they've chosen not to change their practices—consider putting your visit on pause until changes have been made. ... Even if all those criteria are met, not everybody is ready to return for routine dental work — Kat Eschner, Popular Science, 30 June 2020 On infrequent occasions, the Latin plural is eschewed for the standard English -s plural: Given the increasing rate of cyber threats, cybersecurity has become one of the major business criterions every company is focusing on, irrespective of industry or geographic location. — Yahoo! Finance, 8 Jan. 2020 'Criteria' as a Singular Noun There is evidence that criteria is following the pattern of other Latin- and Greek-derived nouns that have shown a preference for the plural form in constructions that otherwise would seem to call for the singular (such as a singular article or being a subject paired with a singular verb such as is): Zenz concludes that the actions taken by the Chinese government meet at least one criteria of the United Nations definition of genocide, namely the prevention of births within the targeted group. — Zachary Evans, [National Review] 29 June 2020 It appears Arizona may no longer meet one of the key White House reopening guidelines. One criteria calls for a two-week downward trajectory of cases or a two-week downward trajectory of positive tests as a percentage of total tests. Arizona has yet to have a decline in documented cases, so it relied on the latter criteria. — Stephanie Innes et al., The Arizona Republic, 4 June 2020 The Dispatch reached out to Ginter's office through Davis to ask what criteria is being used to determine what is being posted and what isn't, as well as how long the policy would last and why Ginter wants to control what the division—which has its own media relations team — is posting. — Bethany Bruner, The Columbus Dispatch, 30 June 2020 According to guidelines just released by Secretary of State Jay Ashcroft, voters who are incapacitated due to illness or physical disability, including caring for a person who is incapacitated or confined due to illness or physical disability, will not be required to have their ballots notarized. ... Franklin County Clerk Tim Baker said the new criteria is confusing and will not safeguard against possible voter fraud. — Monte Miller, The Missourian, 18 June 2020 Donors should fill out one form per type of donated item, and someone will reach out directly to coordinate a pickup. Donors can also state whether their items are unopened, as the criteria varies among hospitals and medical facilities. — Johnny Diaz and Derrick Bryson Taylor, The New York Times, 1 Apr. 2020 Our word data, for example, began its life in English as the plural of the Latin-derived noun datum. A data was a single piece of information, and data worked as a word for all of those pieces taken collectively. The massed nature of data gave it a life of its own as a singular noun. Now when we encounter data in English, it occurs more commonly in the singular ("the polling data was released this morning"). The singular data and the plural use of data still occur, but are rarer than singular data. Another example to which criteria is often compared is agenda, which came to English as a plural for the noun agendum. Agenda referred to the list of things needing to be done, and a single item on that was an agendum. Unlike data and agenda, however, criteria still shows use as a count noun ("there are three criteria") alongside the emerging singular. Only time will tell if criteria will continue to show preference as the singular form over criterion.

Usage Note: Like phenomenon, criterion comes directly from Greek and is singular. In standard usage, the plural is generally criteria, although criterions is sometimes used as well. Properly speaking, the form criteria should never be a singular noun, and phrases like this criteria and single criteria are widely viewed as erroneous. Similarly, the plural criterias is also viewed as a ... Gases is the plural form of the noun gas, which is one of the four states of matter, or, informally in American English, short for gasoline. The chart below graphs potatoes vs. potatoes in English books published since 1800. Even though this chart is not exhaustive in its scope (it only counts books, not magazines or newspapers), it is accurate enough to show that almost no one has used potatos in a published book for at least 200 years. For instance, in Swahili the word rafiki 'friend' belongs to the class 9 and its "plural form" is marafiki of the class 6, even if most nouns of the 9 class have the plural of the class 10. For this reason, noun classes are often referred to by combining their singular and plural forms, e.g., rafiki would be classified as "9/6", indicating that it takes class 9 in the singular, and class 6 ...
